

Table B

Among that portion of Percy Muir's papers held in the Malcolm Collection are various typed sheets detailing titles submitted to him as candidates for inclusion in the IPEX exhibition of 1963 known as Printing and the Mind of Man. Rejects are invariably interesting. They are listed here with the value (added by Muir) and whether or not they were included in the great Scribner science catalogues of 1937 and 1941. The total number of titles is 282.
